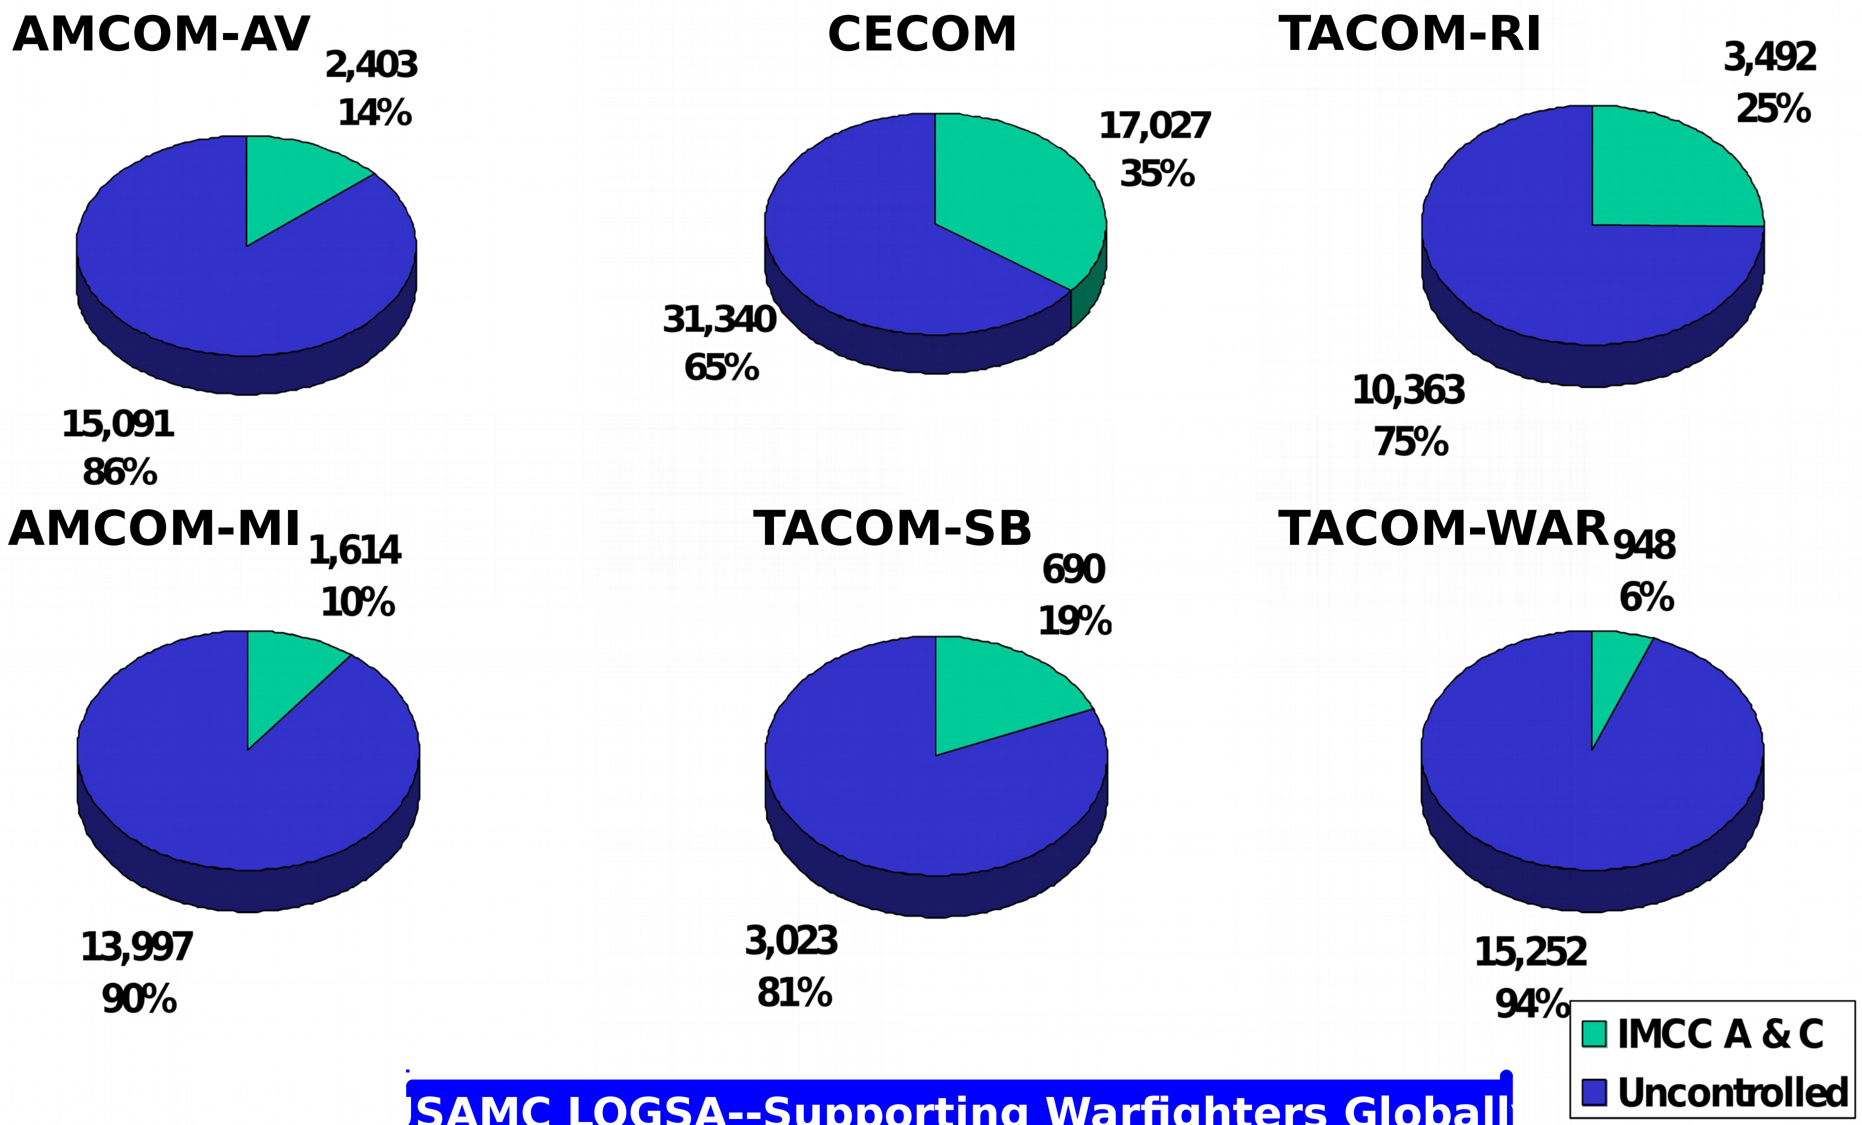
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Jun 06



Breakout of Controlled Items

	IMCC "A"	*IMCC " C"*
AMCOM-A	1,210	1,193
AMCOM-M	1,188	426
CECOM	16,773	254
TACOM-W	547	401
TACOM-R	1,628	1,864
TACOM-SB	564	126

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
